

Clinical Human Andrology/Embryology Position

Marin Fertility Center (MFC), located in the beautiful San Francisco Bay Area just 10 miles north of the Golden Gate Bridge, has an immediate opening for a full-time embryologist or full-time andrologist with an embryology training track. MFC is a two-physician practice with a modern approach to ART practice which balances a variety of novel clinical offerings with a boutique patient care experience.

The preferred candidate will possess both the assertiveness to work independently in the laboratory and a team-player attitude to work within the direction of the greater organization. We are seeking a highly-motivated, detail-oriented person with excellent interpersonal and communication skills.

Embryologist must be proficient at (andrologist to be trained at) independently handling all aspects of the modern IVF lab which include: gamete identification, sperm preparation, conventional insemination and intracytoplasmic sperm injection (ICSI), embryo culture, embryo grading, assisted hatching (AH), preparation for embryo transfer, cryopreservation of embryos, eggs and sperm. Proven proficiency in trophectoderm biopsy and urology procedures (TESE/PESA) is a must.

Position require include excellent verbal and written communication skills, proficiency with managing QC/QA, inventory control, FDA compliance, computing and EHR skills, general problem troubleshooting and ability to implement new services.

Weekend and holiday rotations are required. Salary is commensurate with experience. Excellent benefits/PTO package.

All applications/inquiries will be considered in strict confidence. Only US citizens or individuals holding a green card or valid, current Visa will be considered. Interested candidates should send their cover letter and CV to careers@marinfertility.com
