

FIRST YEAR STUDENTS ADMITTED ON OR AFTER FALL 2020

Animal Science Major Sample Schedule

Plan 1: This plan assumes the student needs to take Entry Level Writing Requirement Course, WLD 41C, and WLD 55M. Placement exams are required for both Math and Chemistry. Students who do not need all of these courses can use a schedule that combines this with Plan 2. The suggested first quarter workload is 12-14 units. Students must increase their academic workload in subsequent quarters to 15 – 17 units per quarter to reach the minimum 180 units required for graduation, or less if they bring in transfer credit including AP and IB. The schedule below totals to at least 153 units of the 180 needed. Workload courses do not count towards graduation units needed but do count towards full time status (towards financial aid) and minimum progress.
