

Agricultural and Environmental Education

Sample Schedule of Required Courses

Plan 1: This plan assumes the student has satisfied the Entry Level Writing Requirement and is ready to enroll directly into Chemistry 2A (General Chemistry) and Math 16A (Calculus). **Students must complete an average of 15 units per quarter in order to graduate (180 units) in four years. AP units and transfer units do count towards the 180 unit requirement.** Please note: courses used to satisfy General Education, College English requirements, and Focus Depth/Restricted Elective options for the major are not specified. Consult the General Catalog or the Animal Science Advising Center for details.
