

Animal Science Major

Sample Schedule of Required Courses

Plan 1: This plan assumes the student needs to take MAT 12 (Pre-calculus), WLD 57 (English A), and WLD 41C (Pre-chemistry). Students who do not need all of these courses can use a schedule that combines this with Plan 2. The suggested first quarter workload is 12-14 units. Students must increase their academic workload in subsequent quarters to 15 – 17 units per quarter to reach the minimum 180 units required for graduation, or less if they bring in AP credit. The schedule below totals to at least 151 units of the 180 needed. Workload courses do not count towards the needed graduation units.
