

Fall 2020 Sample Schedule Transfer Agricultural and Environmental Education Major

In your Aggie Advising Appointment, a staff advisor will discuss how to adjust the below schedule, taking into consideration your transfer coursework. Please be sure to have a copy of your unofficial transcript(s) available for review during your appointment.

Plan A: This plan assumes that you have not completed the lower division science preparatory subject matter, specifically the equivalent of CHE 2A and 2B (General Chemistry) nor have you completed the equivalent of MAT 16A and 16B (Short Calculus) at another college. This plan also assumes that you have taken the Chemistry and Math Placement Exams and have placed into CHE 2A and MAT 16A. Additionally this plan assumes that you have not completed all of your lower division general preparatory subject matter.

Fall		
	ABT 16	2 units
	AED 160	3 units
	Lower Div Science Prep	3-5 units
	Lower Div General Prep	4 units
	Total	12-14 units

Plan B: This plan assumes that you have completed the lower division science preparatory subject matter and the lower division general preparatory subject matter (refer to the AEE Major Checklist for specific courses).

Fall		
	AED 160	3 units
	EDU 115	2 units
	Focus Depth	4 units
	Restricted Elective	4 units
	Total	13 units

*We do not recommend that students start with BIS 2A until AFTER they have completed CHE 2A, 2B.

For Focus Depth and Restricted Elective courses: Please ensure that you have met the prerequisite requirements before registering for the course. If you are unsure, please email asac-newstudent@ucdavis.edu **in advance**.

For Non-Transferrable Agricultural-based courses: We may be able to count these courses to your lower division general preparatory subject matter. Please come prepared to your appointment with a syllabus if you would like them reviewed. This is only for courses that you feel could count towards your **lower division general preparatory subject matter**. **We will not review any other non-transferrable coursework towards other requirements.**

Additional comments concerning your Fall schedule:

We strongly recommend that you keep to a **balanced** schedule, taking no more than 2 sciences/math courses this Fall. Please take **no more than 14 units (including workload units)**.

We also do not recommend that you start an internship your Fall quarter. It is best to get use to the campus and life at UC Davis before starting any internships.

Placement Exam Information:

Chemistry Placement: <https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements/fall-2019>

Math Placement: https://www.math.ucdavis.edu/undergrad/math_placement/

Elective Courses: These courses do not satisfy GE credit needed for the AEE major, but will count towards minimum progress and the 180 unit requirement for graduation.

ANS 18	4 units	MANRRS	1 unit
AVS 13	3 units	EDU 181	2 units
Aggie Ambassadors	1-2 units	GEL 12	2 units
Career Discovery Group	1 unit	PHE 1	0.5 units
First-Year Seminars*	1-2 units		

* A list and description of all First-Year Seminars can be found online at <https://fys.ucdavis.edu/schedule>.
