

Desktop Computer

For the desktop computer, the projector acts as a second HDMI monitor. The first monitor is the regular DELL display port monitor.

How to change the monitor?

1. Hold down the **Windows key** and press the **P key** on your keyboard.

2. Select either the Duplicate or Extend options:

- PC Screen Only
- **Duplicate**
- **Extend**
- Second Screen Only

Select the **Extend** option if you want to use the Presenter View in your PowerPoint presentation; otherwise select the **Duplicate** option.

Easily move Windows apps to another monitor

You can easily move Windows apps to another monitor by grabbing it along the top edge and dragging it from one monitor to another. If the app is snapped, it will be snapped on the other monitor as well.

You can also move Windows apps from one monitor to another using the keyboard shortcuts **Win+Pg Up** and **Win+Pg Dn**
